

# COVENANT OF ANTARCTICA

~A DYSTOPIAN WARS GUIDE TO A GLOBAL SUPERPOWER~

The enigmatic **Covenant of Antarctica (CoA)** is the world's youngest and most unorthodox nation. Officially established in 1857 by its founder, the eccentric Britannian scientist-aristocrat *Lord Barnabas Draynes Sturgeon*, the **Covenant** has caused seismic shifts in global politics and scientific progress in the few short years of its existence. The source of the **Covenant's** influence is the mysterious *Wells Chasm*, a cluster of huge caves in the Antarctic icecap discovered by *Sturgeon* and his original multi-national expedition, back in 1845. Within the chasm, named after the pilot of the scouting aeroplane from which *Sturgeon* had first seen the weirdly glowing anomaly, was something the majority of scientists thought was just a myth; a vast treasure house of extraordinary artefacts and knowledge known simply as '*The Vault*'.

## Naval Battle Group Box

- 1 x Aristotle Class Battleship
- 3 x Plato Class Cruiser
- 9 x Diogenes Class Frigate
- 2 x Ptolemy Class Bomber
- 10 x Small Flyer Tokens
- 4 x A5 Tokens & Templates
- Laminated Stat Cards

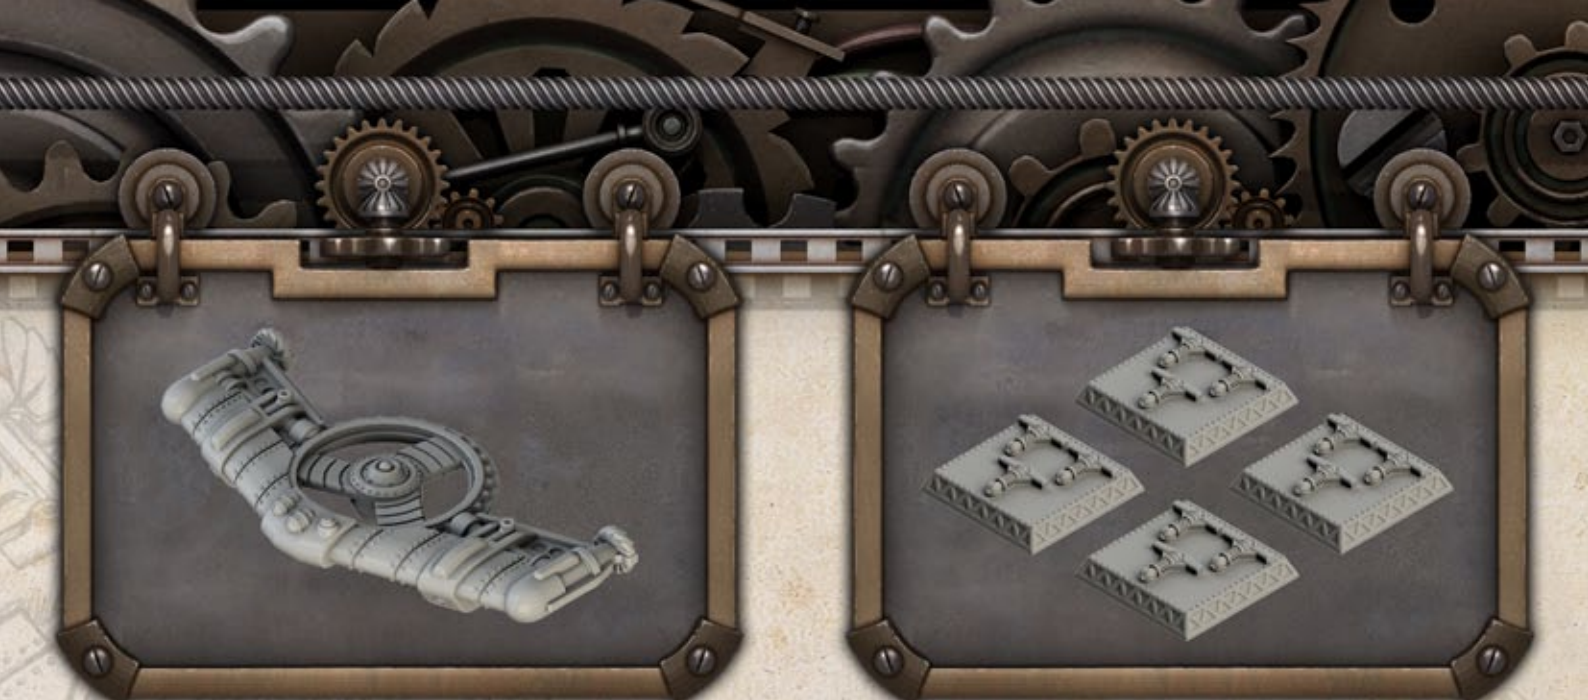

## Armoured Battle Group Box

- 1 x Archimedes Class Heavy Walker
- 3 x Socrates Class Bombard
- 6 x Atticus Class Medium Walkers
- 10 x Xenophon Class Small Walker Tokens
- 4 x A5 Tokens & Templates
- Laminated Stat Cards

The Boxed Set also contains a full colour 40 Page A5 Booklet that contains background, rules and statistics for this nation.

The Boxed Set also contains a full colour 40 Page A5 Booklet that contains background, rules and statistics for this nation.

**Top Left:** The Ptolemy Bomber strikes at enemy models using its fore guns and can choose between dropping bombs or mines from its rear. **Top Right:** The CoA does not use human pilots, rather it deploys unmanned drones that are controlled from an airfield or from a Carrier, such as the Epicurus Sky Fortress or Pericles Fleet (Drone) Carrier. **Below:** From left to right we have the Diogenes Class Frigate, Plato Class Cruiser, Aristotle Class Battleship and Galen Class Escort.

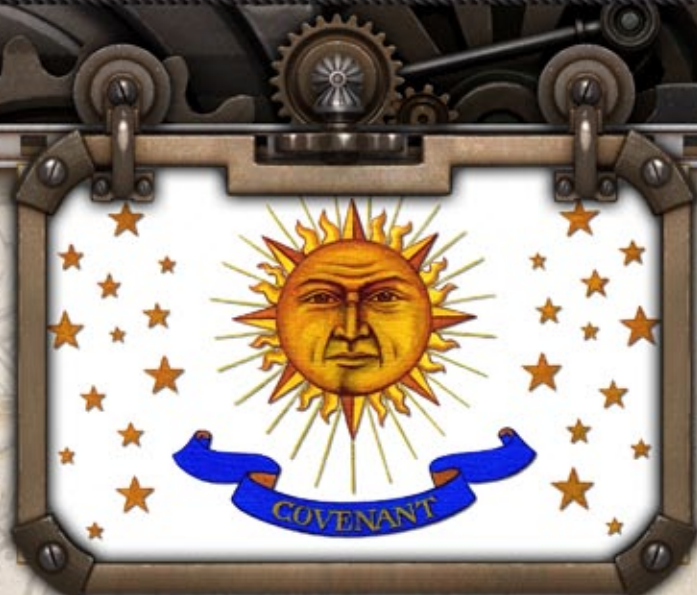

**Top Left:** The Archimedes Class Heavy Walker scuttles across the battlefield, weapons ripping its enemies apart from distance, looking to close in so that its front claws can rip them apart. **Middle:** Long range Artillery support is provided by the Socrates Bombard. **Top Right:** Xenophon Class Small Walker tokens scurry to battle.

**Bottom Left:** The Atticus Class Medium Walker forms a core part of a **CoA** ground assault force, its fore guns softening the enemy up and its broadsides picking off any enemy that try to flank it. **Bottom Right:** The Icarus Class Medium Flyer can lay down destructive fire to any arc during combat and plays a vital role in any **CoA** engagement.

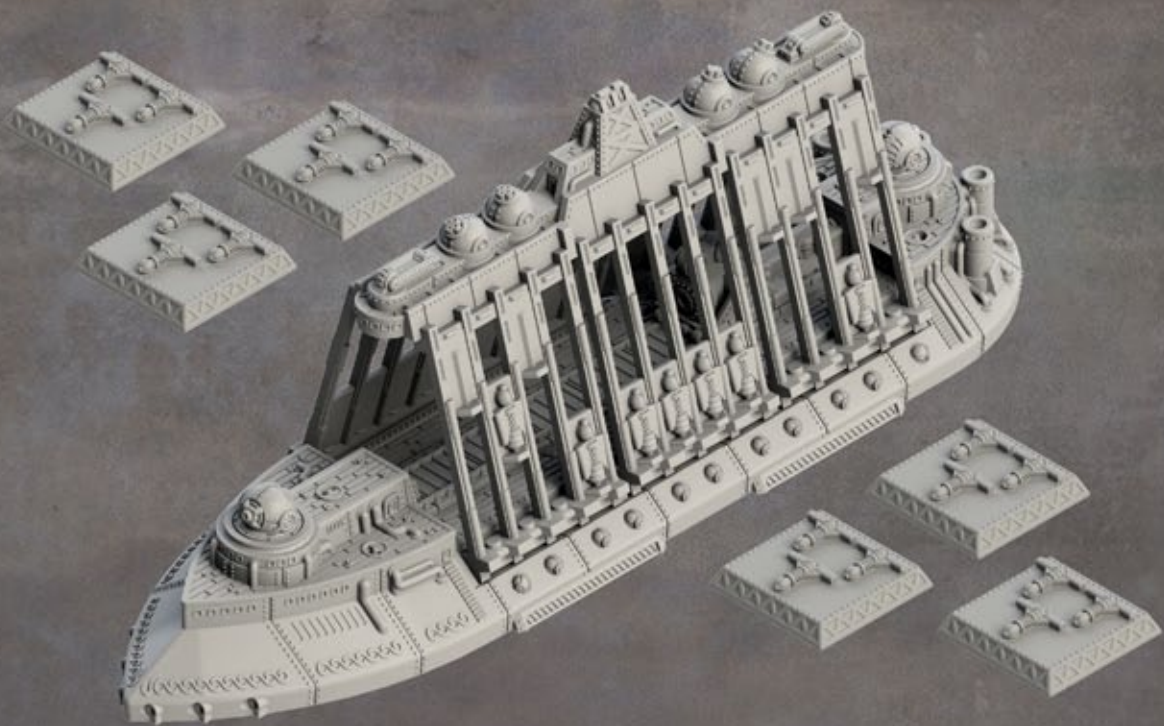

A number of upgrade models have been designed for this nation, several of which can be seen in this document. These include the Pericles Class Fleet Carrier, Prometheus Class Dreadnought, Zeno Class Armoured Cruiser, Callamachus Time Dilation Orb, Daedalus Class Large Flyer, Pytheus Small Flyer and many more ...**Above Right:** A Pericles Fleet Carrier with its 6 Tiny Flyer Tokens. **Below:** A naval unit makes its way to battle.

**Above:** This massive machine is one of the more advanced vessels in the **CoA's** fleets. The Pericles Class Drone Carrier deploys 6 'drones' and operates by watching its drone fly around the gaming table, eventually running out of fuel and ditching. A massive crane in the centre section of the Carrier collects the drones and remounts them onto the six launch racks on the sides of the vessel.

**Right:** The Callamachus Time Dilation Orb struts around the battlefield, its long legs allowing it to tower above other models and terrain, its advanced technologies allowing it to teleport objects and slow/speed up time.

**Above Left:** A Squadron of two Icarus Class Medium Flyers - the models come with an acrylic flying base. **Above Right:** The Aristotle Battleship is an ingenious design, and can submerge as it approaches enemy models, only its upper superstructure above the water. Each Battleship comes with a clear acrylic template that marks the location of the model when under the waves. **Below:** An Armoured Battle Group prepares for combat. At the heart of it is the Archimedes Heavy Walker, Atticus Medium Walkers to the front, Socrates Bombards in support at the rear and Xenophon Small Walker Tokens flanking.

AUGUST 2011

***WE'RE  
COMING!***
